Club gliders are charged at a rate per minute. To determine the charge for a flight you must take the tow fee and add to it the calculated glider usage charge. The club glider usage rates are provided below. To calculate the glider usage charge you simply multiply the glider usage rate by the number of minutes recorded for the flight. The result is the total charge for the flight. The club operations software will automatically calculate the appropriate charges for each flight.

The Grob is charged at a rate of \$0.50 per minute

Other club 2-seat gliders are charged at the rate of \$0.25 per minute.

Club single-seat gliders are charged at the rate of \$0.23 per minute.
